

Press release

## Hydrogen mobility: As part of SimpleFuel™ team, McPhy Energy NA will display a refuelling solution at ACT Expo in Long Beach (CA) from May 3-5.

At the clean transportation and alternative fuels tradeshow, McPhy Energy NA and its consortium partners will present a compact and cost competitive SimpleFuel™ refueling solution for targeted fuel cell vehicle and material handling markets.

*Newton, MA, May, 02 2016* – McPhy Energy NA, a company specialising in hydrogen production, storage and distribution equipment for industry and energy markets, will present, SimpleFuel™ a refuelling solution at its stand (No. 1712) at Advanced Clean Transportation (ACT) Expo, the leading carbon free-mobility event in the United States to be held in Long Beach (CA) from May 3-5. IVYS Energy Solutions, PDC Machines and McPhy Energy are collaborating in the development of the SimpleFuel™ refueling solution.

This turnkey SimpleFuel™ refueling solution integrates on-site hydrogen generation, compression and dispense technologies in a compact footprint while ensuring safety and cost-effectiveness. The SimpleFuel™ product is targeted towards vehicle fueling markets such as residential, small fleets, work place, and service centres. In addition, the solution will also enable fuel cell material handling solutions to address the fueling needs of small distribution centres and retail stores.

Pascal Mauberger, McPhy Energy's Chairman-CEO, and Prabhu K. Rao, CEO of McPhy Energy North America, will represent McPhy Energy at ACT Expo. At the invitation of the organizers, on May 2<sup>nd</sup>, Pascal Mauberger will present European initiatives for energy storage and the hydrogen sector at the California Hydrogen Business Council Meeting being organized in collaboration with the ACT Expo.

### **About McPhy Energy**

McPhy Energy is a leading developer of hydrogen-based solutions for industry and energy markets. The company draws on its exclusive technique for storing hydrogen in solid form and its years of experience in producing hydrogen through water electrolysis to design and manufacture flexible production, storage and distribution equipment.

McPhy Energy markets easy-to-use, environmental-friendly solutions combining unique safety features and energy independence in the renewable energy, mobility and industry sectors.

The Group has three production sites in France, Germany and Italy, a R&D laboratory in France and three sales subsidiaries in North America, the Asia-Pacific and the Russia-Eastern Europe-Central Asia regions.

McPhy Energy is listed on NYSE Euronext Paris (Segment C, ISIN code: FR0011742329; ticker: MCPHY).
